22 min., sd., color, 16 mm. (Ages and stages series)
French version released under the title Petit monde à quatre et cinq ans.
Summary: A study of the behavior of four- and five-year-old children at home and at nursery school, presenting typical examples of the actions of a child at these ages. Shows the vacillation between infantile helplessness and vigorous self-assertion at four, and the development of independence and the beginnings of cooperation at five. Presents advice and encouragement to parents.

Frustration and fixation (*Motion picture*) Robert S. Feldman, P. Ellen and Rollin H. Barrett, 1951. Released by Psychological Cinema Register, Pennsylvania State University.
19 min., sd., b&w, 16 mm.
Summary: Documents Maier's thesis that frustration leads to fixation and other bizarre symptoms. Shows a modified Lashley jumping apparatus and describes the process of teaching rats to jump. Portrays the successful solution of a soluble problem, and typical frustration responses to insoluble problems: refusal, escape, stereotyped choice. Frustrated animals finally assigned to soluble problems persist in fixations in spite of open correct doors, and although walking trials demonstrate that they know the correct choice. Includes demonstrations of catatonic and neurotic behavior.

Frustration play techniques (*Motion picture*) Child Study Department, Vassar College. Released by New York University Film Library, 1946.
40 min., sd., b&w, 16 mm. (Series on normal personality development)
With guide and explanatory notes.
Summary: Demonstrates projective techniques developed by Dr. Eugene Lerner of Sarah Lawrence College for the study of ego development and the demarcation of the self in young children. Shows test situations in which the experimenter presents obstructions to the children's play in order to observe characteristic variations in behavior response. Frustration and hostility games reveal how the child responds to a series of frustrations. Explains the theory and demonstrates the technique using several widely differing types of children.

Summary: Poses the question of whether there are circumstances in which one group may justifiably deny to another a chance to present its views at a public meeting when a question concerning both is at issue. After the members of a teen-age club are accused of destructive behavior and, without a hearing, are denied the use of the community center, they hire a hall to voice their protest publicly. When they find out that the chairman wants to attend the meeting to give the community center committee's point of view, some think that he should not be given the opportunity, while others feel that it is his democratic privilege.
